

Curriculum Vitae

Dr. Alireza Bashari,

President, Iranian Society
of Petroleum Geology.,(ISPG)
Office :4th Floor, No., 9th Alley.
South Abouzar St., Khajeh Abd...Ave.,
Tehran 1661634155, Iran, Tehran.
E- mail address: <a_bashari@yahoo.com>

www.ispg.ir

Mobile: +98(0) 912 3235096

PROFILES

Formerly Head of Exploration Department and also Manager of (R&D) Iranian Offshore Oil Co., & Faculty member of Institute of Petroleum Industry, Currently **President of Iranian Society of Petroleum Geology**. He is also adjunct professor of different universities around the world (including Tehran School of the Mine, Calgary, Curtin universities and ECOLE DU PETROLE ET DES MOTTTEORS IFP SCHOOL).

Obtained a PhD degree in Petroleum Reservoir Characterizations from University of New South Wales, Sydney, with having more than 50 years experiences. Started his career since 1974, as a wellsite and subsurface geologist with Sofiran 66 (Elf Iran) in the Persian Gulf.

During his career he was in charge of several Exploration /Development activities in the Persian Gulf for Elf, Iranian offshore Oil Co, and Bridge Oil Co. Sydney, Australia (Bowen Basin, Queensland).

He has gained significant operational and technical experience by holding different capacities within Iranian Offshore Oil Co (IOOC). Much of his career has been spent in leadership /management roles at IOOC in Exploration Department. Other roles included teaching and supervision of MSc & PhD students.

He has published a number of peer-reviewed journal articles and also conference papers on reservoir characterisation (carbonate & siliciclastic reservoirs) of the Iranian oil and Gas Fields as well as Queensland Bowen Basin, Australia. His research has been focused on integrated solutions for reservoir characterization, formation evaluation / petrophysics.

He was, member of World Petroleum Council (National Committee Member) since 2003, Co-Editor, Iranian Journal of Petroleum Geology, president of local chapter EAGE and also active member of AAPG.

EDUCATIONAL HISTORY

- 1972 Tehran University, Iran. BSc. (Hons) in Geology.
- 1980 Shahid Beheshti University MSc. in Earth Sciences.
- 1996 University of New South Wales, Sydney, (UNSW), Australia, PhD, Petroleum Geology and Reservoir Characterization.

Work Experiences:

over 50 years work experience, as a well-site Geologist, Sr. Geologist, Research Project Leader, Head, Exploration Geology and Research & Development Manager, as well as Adjunct Professor at the different universities.

INDUSTRY COURSES:

Nov. 74 - Jan. 75:

*Well-site Geology
Elf Aquitaine, Tehran*

Sept. 76 - Jan. 77:

*Petroleum Geology & Petrophysics
Elf Aquitaine, France (French Language)*

July 94:

*The Role of Formation Evaluation in Reservoir Management -
an integrated approach
School of Petroleum Engineering,
University of New South Wales (UNSW), Sydney, and several
courses in Petroleum Geology, petrophysics, and 3D seismic
interpretations and etc.*

October 2002:

Jason Geosystem: Introduction to Quantitative analysis of
Impedance Data. (Paris)

January 2002:

Value of the Technology: Shell Technical Services, Iran
B.V.Tehran.

15th to 19th February 2003:

Petroleum Economics: Roberston, Petroleum Training Centre.,
Kish Island, the Persian Gulf.

PROFESSIONAL HIGHLIGHTS:

2005- Present:

President of Iranian Society of Petroleum Geology
(ISPG) & Adjunct professor at the different universities around
the world.

1999- 2009 : Head, Exploration Geology and Manager of Research & Development Iranian Offshore Oil Company.
Research Assistant Professor, Research Institute of Petroleum Industry (RIPI) & Adjunct professor at school mining Eng, Tehran uni. / Amir Kabir, Azad & Overseas Universities.

Accomplished Research Projects:

1999- present

Supervised more than 40, Msc, and PhD students and supervision of over Ten Completed industrial projects at (R&D Dept.), Iranian Offshore Oil Company.

1987 - 1991:

Research Project Leader

Geology and Petrophysics Department
Iranian Offshore Oil Company

Main Responsibilities Prospective Evaluation of Khuff Gas Reservoirs (Permian- Triassic Carbonate “Kanghan Dalan Formations” surrounding the supper Giant North Dome Gas Field of Qatar in the Persian Gulf .
Reservoir evaluation of common prospective and undeveloped fields in Persian Gulf (Falah, Saleh. Fields., etc).

Jul. 82 - Sept. 87: **Senior Research Geologist**

Main projects

- Permian-Triassic Sediments (Deep Khuff Carbonate Reservoir “Kangan & Dalan Fm.) of the Persian Gulf in relation to the accumulation of natural gas (Lithostratigraphy, Formation Evaluation Sedimentology, Petrography, and "Internal report, 62 pages, 1983").
- Stratigraphy and reservoir evaluation of the middle-upper Cretaceous.
- Study of the aquifer formation, dump flood for injection wells (based on wire line logs).

Dec. 80 - Jul. 82: **Senior Operation Geologist**

Main Responsibilities: Supervision of well-site geologists and well logging units on offshore drilling platforms, included the Exploration & Development phases and the training of new geologists.
Control on coring operations, analysis description of core samples and quick wireline logs interpretation on well site.

Dec. 79 - Dec. 80: **Subsurface Geologist**

Main Responsibilities: Subsurface geologist of exploration and development wells in the Gulf, preparation of stratigraphic correlation sections,

composite logs, analytic logs, log interpretation, development geology mapping of oil fields and formation evaluation and preparation of final reports.

Aug. 74 - Dec. 79:

Well-site Geologist
Sofiran 66 Oil Company (Elf Aquitaine)

- Responsibilities:
- Application of geological programme of exploration department.
 - Supervision of mud logging units.
 - Examination, description of drilled cuttings and core samples for Lithological identification and hydrocarbon show evaluation.
 - Supervision for accuracy of logging operation and quick wire line log interpretations.

RESEARCH POSITIONS:

Sept. 1999 – Present:

Research Assistant professor@ RIPI & Adjunct professor at:

School of Mining Engineering, Tehran University, Amirkabir, Azad & Overseas universities (Curtin, Calgary and IFP Universities)

Lecturing program:

(Subsurface Geology & Petrophysics)

May 1996 - 1999:

Research Associate & Lecturer
Geology Department, University of Auckland, NZ.

Lecturing program:

Application of Wire line logs in Sedimentary Basin Studies,
Geology Department, University of Auckland, NZ.

Oct. 95 - Mar 96:

Research Assistant/Teaching Fellow
School of Petroleum Engineering, University of New South Wales, Sydney.

Projects:

Formation Damage of different reservoirs in (Australia)

Aug. 95 - Mar 96:

Project:

Research Assistant
Applied Geology Department, University of New South Wales
Fraction ignition of methane from coal mines
(Petrography & mineralogical studies)

ACADEMIC PROJECTS:

- 1992 - 1996: *Ph.D. Thesis*
University of New South Wales, Sydney (UNSW) Australia.
- Research project: Petrography, Diagenesis and Reservoir Characterisation, Rewan Group, Bowen Basin, Queensland, Australia.
- 2000- present: Supervision of:

Over 40 M.Sc. and PhD students at different universities:
Tehran University, Curtin University, (Australia), Calgary University (Canada), (IFP), France, Petroleum University of Technology (PUT) and Azad University, Tehran. and Amir Kabir University.

ABSTRACTS OF PAPERS AT PROFESSIONAL MEETINGS & UNREFEREED PUBLICATIONS

- Bashari, Alireza.,1988. Occurrence of Heavy Crude Oil in the Persian Gulf, in R.F. Myer and E. J. Wiggins, (Eds.): Fourth International UNITAR/ UNDP Conference On Heavy crude and Tar Sands, V.2, Geology, Chemistry: International Conference on Heavy Crude and Tar Sands, , Edmonton, Alberta, Canada, 2, 204-214, August 1988.

- Bashari, Alireza., Rashidi, B.M., 1986, Real time Bit Wear Analysis and Drilling Optimization: a case study for a well in an oil Field , Persian Gulf.

MANUALS:

1-Application of Wireline Log on Sedimentary Basin (Petrophysics),

Research Institute of Petroleum Industry, (*RIPI*) Tehran (2001).

2-Clay mineralogy. (2001)

3-Principles of Drilling Engineering in Oil & Gas Exploration. (2007).

Honors and Awards:

- 1976 -1977: Full Scholarship plus salary to attend Petroleum Geology & Petrophysics course in France (Sofiran.66 Oil Company, ELF-Iran).
- 1991 - 1995: Ph.D. Scholarship, (National Iranian Oil Company).
- 1995 - 1996: CRC Well bore Engineering Scholarship, University of New South Wales, Centre for Petroleum Engineering.
- NIOC Distinguished Researcher, *2002,2003&2004*
- NIOC **Distinguished Service Award**, *2002,2003&2004*
- EAGE European Association of Geoscientists & Engineers, **Distinguished Service Award, 2009.**
- NIOC retired, Distinguished Service Award, March 20015.

Affiliated and Associated:

Societies, Sections and major offices held:

2006-2009: President of European Association of Geoscientists & Engineers, Local Chapter,

2006-Present: President (elected) of Iranian Society of Petroleum Geology (*ISPG*).

2003-2005: 18th World Petroleum Council, Johannesburg (National Committee Member) .

2005-2008: 19th World Petroleum Council, Madrid (National Committee Member).

2008-2011: 20th World Petroleum Council, Qatar (National Committee Member).

2011-2014: 21 World Petroleum Council, Masco (National Committee Member).

Member of Research and Development Council of NIOC

1992- Present: American Association of Petroleum Geologists (**A.A.P.G, Active Member**)

2002- Present: Iranian Society of Petroleum Engineering

2010-Present: Co-Editor in chief, **Iranian Journal of Petroleum Geology.**
